

Generative Tools

For Automated Software
Development and Modernization

Our customers confirm: generative tools deliver quality and flexibility by coevally saving costs!

„Using SCORE we pave the way for new kinds and requirements of business demands like, for example, the internet. SCORE allows us using reliable functions within new applications economically and we are thus able to respond faster and risk less—for the benefit of our customers.“

**Hugo Holm, CIO, Kanton Aargau
Switzerland**

„With the successful migration of our development environment to Deltas development platform SCOUT² we made the decisive first move to the modernization of our complete application portfolio. The cooperation with Delta is really convincing and we are looking forward to the next modernization steps which we will also perform in close cooperation with Delta.“

**Gerard Doll, Director ICT, RDW
The Netherlands**

Delta Software Technology is one of Europe's leading companies in the domain of building modern software generators for the integration and modernization of COBOL applications.

Our generative solutions bridge the gap between legacy applications and up-to-date architectures and technologies. They bring about applications adopting themselves to all kinds of changing business processes, technical infrastructures and available resources fast and reliable and they hence help you to profit from an ever-changing world.

Known as “The Generator Company” we combine our standard products and core technologies, most recent research findings as well as specific professional services to highly customized generative solutions automating and optimizing your integration and/or modernization projects.

For 30 years, Delta successfully provides Europe's leading companies like e.g. AMB Generali, AXA, Deutsche Telekom, IDG, La Poste, RDW, Schorch, Suva and UBS with modern software generator technology.

30+ Years of Delta:

Proven generative tools
For efficient and reliable
Software development and modernization

The Generator Company

How do you call your IT Project?

Development and modernization projects exist in various kinds and sizes and may have most different names.

Whether you call your project SOA, BPM, Basel II, portal development, EAI, integration, porting, migration, transformation, further development, downsizing, off-loading or architecture consolidation – the point always is: you want to make use of the investments you've made and to get the best out of the existing applications, data and development processes.

During the last 30 years we watched a continual coming and going of business processes, IT technologies and architectures. We are no fortunetellers but what we do know is that business processes, technical infrastructures and the availability of resources will change more rapidly in the future.

In this ever-changing world we helped our customers to profit from those changes. Some of them are B+S Bankssysteme, Cordares, Datenzentrale Baden-Württemberg, Hüttenwerke Krupp Mannesmann, MAN Steyr, METRO, Schorch and Swisscom.

We deliver outstanding generative solutions

Frequently, standard product vendors say "our product solves every problem". "We have to develop everything individually", state the service providers. We say, both are wrong!

Delta offers you the best of both worlds. We deliver highly customized generative solutions perfectly tailored to the requirements of your project and beyond it guarantee the permanent free choice of technologies and implementation strategies. The combination of our standard products, core technologies, most recent research findings and specific professional

services provides you with the quality, functionality and support of a standard product and, moreover, also guarantees utmost flexibility due to the development of highly customized solutions. Our generative solutions bridge the gap between legacy applications and up-to-date architectures and technologies. They automate and optimize your integration and modernization projects.

For 30+ years, we successfully provide some of Europe's leading companies with modern software generator technology. We are rightly known as "The Generator Company".

Using our development tools, many of our customers were able to profit from new business models and technologies. Amongst them are DBV-Winterthur, Suva, Voestalpine and WestLB.

Committed to your success

The projects we realized during the last 30 years confirmed: Tools need a methodical approach!

We are in close cooperation with accredited solution partners to cover your requirements and provide you with precisely those generative solutions your project demands.

Systematic support by our highly qualified service teams in combination with on site coaching supervised by our generator architects and developers is one of the keys to your success.

We are proud of the fact that our business connections, which often are lasting for decades, enabled us to help customers like Crédit Agricole, Deutsche Bundesbank, Liechtensteinische Landesbank, Providentia and RDW over and over in optimizing their mission-critical applications for today and getting them ready for the future.

Delta Software Technology

Delta Software Technology is a leader in advanced software generators for the integration and modernization of COBOL applications.

As "The Generator Company", we deliver outstanding generative solutions that bridge the gap between legacy applications and modern architectures and technologies, creating value from an ever-changing world by building applications that quickly and securely adapt to changing business requirements, technical infrastructure and available resources.

SCORE® Adaptive Bridges™

Make your mission-critical COBOL applications quickly and securely available as real services for new applications.

AMELIO® Modernization Platform™

Change your large IT applications with a bespoke factory: securely, reliably, error-free and 100% automated.

SCOUT2™ Development Platform

Increase the productivity and reliability of your development process with an integrated view of all software components, tools, processes and platforms.

ADSplus™

Increase the value of your existing applications. Add new functionality to your applications using your existing technologies and platforms.

For 30+ years, Delta successfully provides modern software generator technology to some of Europe's leading companies. Amongst them are AMB Generali, AXA, Deutsche Telekom, IDG, La Poste, RDW, Suva and UBS.
