## 1 Delivering Adaptive Services with EAI/ESB Architectures

### White Paper SCORE Adaptive Bridges for EAI/ESB

EAI/ESB architectures are well suited to integrating application packages due to the wide range of standard adapters available. Integrating your valuable custom applications, however, requires custom solutions, whose manual implementation and maintenance are cumbersome and expensive. Are you looking for a solution to automatically integrate your custom applications?

When these are your requirements:

- Intelligent and agile services with optimal service quality
- Non-invasive – no changes to your existing applications
- No proprietary adapter technology
- No manual development and maintenance of the integration code
- Quick and reliable automatic generation
- Connect to existing application

and data architectures

- Consistent view for application functions and data access
- Custom, optimised interfaces
- Use of the server-side security, audit and system management procedures
- Usable across the complete range of your applications and technical architectures

Then read in our new white paper how SCORE Adaptive Bridges enables you to non-invasively use your existing legacy custom applications to quickly, easily and automatically deliver the intelligent and agile services your EAI/ESB client applications need to meet new business requirements.

### Try Now!

The quickest and easiest way to learn about [SCORE Adaptive Bridges](#) is to try it for yourself! A free 30-day trial version of SCORE Adaptive Bridges – Express Edition is available now as a download and on CD.

### Further Information

If you would like to know more about SCORE Adaptive Bridges then you will find comprehensive information in the Product area of

our Web site. Alternatively please contact your local sales representative.

**SCORE Adaptive Bridges - Delivering Adaptive Services with EAI/ESB Architectures**

EAI/ESB architectures are well suited to integrating application packages due to the wide range of standard adapters available. Integrating your valuable custom applications, however, requires custom solutions, whose manual implementation and maintenance are cumbersome and expensive. Are you looking for a solution to automatically integrate your custom applications? Read in this white paper how SCORE Adaptive Bridges enables you to non-invasively use your existing legacy custom applications to quickly, easily and automatically deliver the intelligent and agile services your EAI/ESB client applications need to meet new business requirements.

## **2 Service-Oriented Architecture: Moving from Hype to Implementation and Usage – Expert Seminar 8th May 2006**

### **New Functions Give Even Better Overview**

The new version 4.1 of our SCOUT<sup>2</sup> Development Environment is available with immediate effect. Building on the large number of enhancements introduced in release 4.0, this update version contains further new functions that give you even more possibilities to customise the user interface to meet your exact requirements.

The most important functions are:

- **Additional Options for Defining The Search Path** – It is now possible to selectively include in the search path of a project the workspaces of any parent projects. In this way it is possible, for example, to quickly and easily create an isolated development and test environment without dis-

rupting your running projects. With this new option it is no longer necessary to check in all of the required modules from their corresponding workspaces to be able to access them from the isolated development and test environment.

- **External Object Information** – SCOUT<sup>2</sup> now offers the possibility to display and maintain information about objects that is obtained from outside SCOUT<sup>2</sup>. This information is made available via so-called Extrinsic Values. Additional scripts make it quick and easy to include the information into your working environment in a reliable and consistent manner.
- **Project Cleanup** – A clean and tidy work area improves productivity. The new cleanup function allows you to choose to selectively clean the workspaces when you open or close a project.

For more detailed information on these and further enhancements please see the release notes in our Support Area.

### **Availability**

The latest version of our SCOUT<sup>2</sup> Development Platform is available immediately. You can order the new version of the SCOUT<sup>2</sup> Development Platform by contacting your local sales representative.

### **Further Information**

If you would like to know more about the SCOUT<sup>2</sup> Development Platform then you will find comprehensive information in the Product area of our Web site. Alternatively please contact your local sales representative.

### **3 New Documentation Library**

#### **The Knowledge You Need To Profitably Use Delta Products**

The tools from Delta Software Technology help you to implement your projects more efficiently. Our Documentation Library offers a comprehensive collection of detailed documentation, white papers and fact sheets for the complete range of Delta products.

The Documentation Library provides you with knowledge about the fundamental methods and concepts of the products, as well as the detailed technical know-how required by every professional developer. By using the Documentation Library you can further increase your return on investment in Delta tools.

Quickly find what you are looking for with reference and tutorial information provided in a range of formats optimized for either online use or printing.

In addition to many new manuals and other documents, our latest Documentation Library also contains a completely reworked version of the documentation for ADSplus. The new ADSplus documentation is initially available in German. The English version will be available shortly.

#### **Availability**

The new Documentation Library is available immediately. Get the knowledge you need to make the most profitable use of your Delta products. Order your example of the Documentation Library now.

You receive the new Documentation Library at no charge as one of the benefits of your maintenance contract. You can immediately start to use the Documentation Library as no installation is required.

#### **Further Information**

We are continually working to improve and update our documentation. The most recent editions are made available on a regular basis in the Support Area (myDelta) of our Web site.
